COMPANY OVERVIEW

JOSM ELECTRICAL (Pvt) Ltd is the best switchboard manufacturing company in Zimbabwe, serving the industrial, mining, agricultural, domestic, hospitality and commercial sectors.

The company was formed in March 2002 as a result of the merger of the largest switchboard, light sheet metal and electrical panels, with the aim to supply and fix. The establishment of JOSM ELECTRICAL brings together great experience and expertise in the manufacturing and supply of electrical switchboards, general sheet metal and electrical installations in all sectors and work with a clear aim on meeting customer needs.

i. MANUFACTURER OF SWITCHBOARDS

JOSM ELECTRICAL switchboards department has the best quality of Low Voltage Distribution equipment in Zimbabwe ranging from small single-phase panels (220V) to large three phase panels (550V). At JOSM ELECTRICAL we offer a bespoke of your type and requirements. We use genuine Siemens, Schneider Electric, Chint Electric and other preferred switch-gears and accessories. Our standard panel colour from powder coating is Pastel Grey, Hammertone Grey and Electric Orange which is usually used in industrial structures, but other colours as per customer requirements can be provided. Our main switchboards have been installed in shopping centers, mines, multiple domestic developments, high rise buildings, large factories, warehouses and many other places in Zimbabwe and not forgetting the famous Mbuya Nehanda Statue in the Harare CBD.

FABRICATION OF THE FOLLOWING PRODUCTS

- Current Transformer Circuit Boards
- 3 Phase Meter Boards
- Single Phase Meter Boards
- 4 Door Enclosures
- Star Delta Starters
- Variable Speed Drives
- Mains and Sub Distribution Boards
- Cable Management
- Mini-flush Boards
- PLC Panels
- General Enclosures
- Distribution Boards
- And any other of desired features

AUTOMATION DEPARTMENT

1. Automation products-S7, PCS7, WinCC SCADA.
2. Field/Process Instrumentation:
 - Pressure- Gauge and Absolute pressure transmitters, Differential pressure transmitters
 - Level- Radar, Guided microwave, Ultrasonic, capacitive, hydrostatic, Conductive ,Vibro
 - Temperature- RTDs, Thermocouples and controllers.
 - Flow- Electromagnetic, Variable area, Coriolis, Orifice plate, differential pressure Ultrasonic Rotary piston, Open channel, Flow through switches and Clamp-on.
 - Electro-pneumatic positioners/ Electric Actuators
 - Process protection- Acoustic sensors for pumps and material flow monitoring, Motion sensor
 - And speed switches.
 - Weighing- load cells and integrators for statics, Loss in weight, Belt and Batch weighing.
3. Motion control- Medium voltage drives and motors, low voltages drives and motors.
4. Equipment and software: We have simulators (inclusive of HMIs, Simocode, Profibus and ethernet networks, step 7 and WinCC flexible software. This equipment is used for testing software generated for projects as well as for training purposes.
5. Low voltage switchgear.
6. Technical support services.
